A piece of cake or a slice of pie for each private doing border duty here was the idea of the military committee of the chamber of commerce for Christmas dainties for the solulers, but it seems that there will be cookies, ple, cake, candy, preserves and other sweets for each man, judging from the responses already received by the committee from El Pase housewives.

Following is the list of promises received up to Saturday morning at 9 oclock:

Increased Living Cost Spreads To Far Points Not Touched by Big War

New York, Dec. 2.—The people of America are not the only onas who are suffering from the increased cost of living.

One of the largest bunking institutions in New York has been receiving world wide reports, and has made up a statement. It finds among other things that the advanced cost for the acceptions of life are not confined to these countries that are even remotely affected by the war. Increase in cost has come apparently because it is possible rather than from any justification. The people of Jamaica bave advanced the price for their large wood to three times what it was a couple of years ago. The indigo provers of India and Java bave made their prices ten times what they were before the beginning of the war. Chinese and Japaices allks have doubted in price in the last two years. Even those commodities where there is the least possible reason for increase have gone up tremendously. The high price for each is by no means confined to this country, nor to those where war prevails. Micaront, corea, markoret and cheese are universally high, and the important point is that the increased figures are quoted for them at the place where they are grown or manufactured, and the sidvance in Irelight rates and ocean carrying is only incidental to the burdens placed upon the consumer.
